ADVANCED STEPPED HULL
 designed by *Adam Younger*

With hulls designed by the "Stepped Hull Guru", Adam Younger, Northstar's ION series offer unmatched seakeeping qualities with very high performance levels. All Northstar IONs are manufactured with vacuum infusion technique creating very strong and lightweight composite laminates. Topping our excellent hulls are decks with clean lines and functional features. Both ION 10.5 and 12 offer 4 stand up bolster seats under the hardtop with suspension seats optional. ION series come with a long list of options allowing you to create an ION just for you.
