COUNTRIES

HIGH-LEVEL MANUFACTURING

Advanced manufacturing applications, osmosis barrier coat, squish molding and RTM. Open molding manufacturing with hand fiberglass layup and vacuum infusion process. High quality, all fiberglass boat including a foamed fiberglass stringer.

This combination of materials provides exceptional soundproofing.

THE AMERICAN QUALITY

American inspired performance powerboats that exceeds expectations of sturdiness and quality with a strong design.

INTELLIGENT ENGINEERING

Modern engineering process; CAD development and engineering.
In house robotic milling, plug building and full scale prototype development.

BUILT FOR ADVENTURE

The Wellcraft 355 takes the lead in every aspect: outstanding design, comfort, speed and seaworthiness! Designed to push the limits - out past the horizon where the water is deep and adventure begins - Wellcraft utilized its rich heritage of offshore experience to push into this new market with American flare and shameless enthusiasm.

WELLCRAFT 355

WELLCRAFT 355

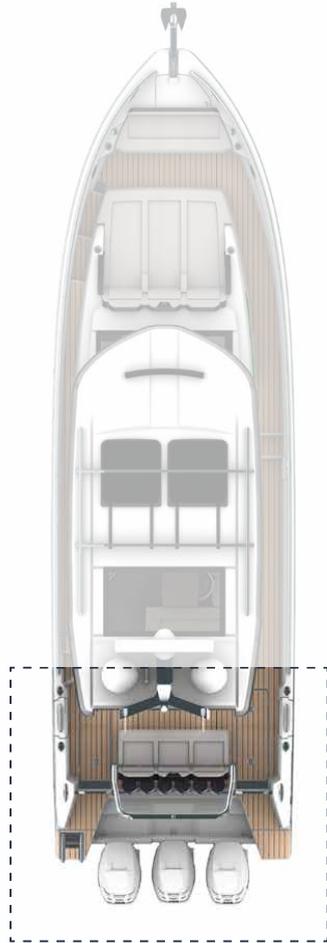

The Wellcraft 355 structure is built in a special injection process. As such, the hull and the whole structure are manufactured in one shot. Combined with the overall balance of the center of gravity, the hull is very stiff, light and efficient.
